

## idea 9L

Latest generation automated kiosk that allows the sale of even fragile products in total safety, thanks to the Magex patented dispensing system.

Its wide 22" touchscreen panel can display all the data related to the objects offered for sale, with the addition of images, descriptions and video.

Idea9L is suitable for the sale of a various range of products, in particular delicate objects and food.

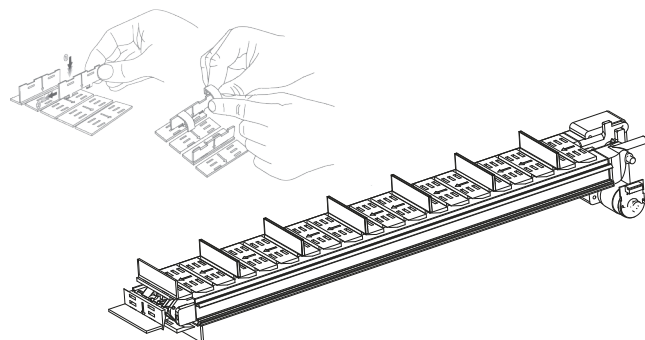

Idea9L has **9 lines** on every floor with up to 8 floors.

The kiosk has a 22"HD touch display with 1920x1080 pixel resolution: this screen provides a full products menu with product description, pictures and promotional video.

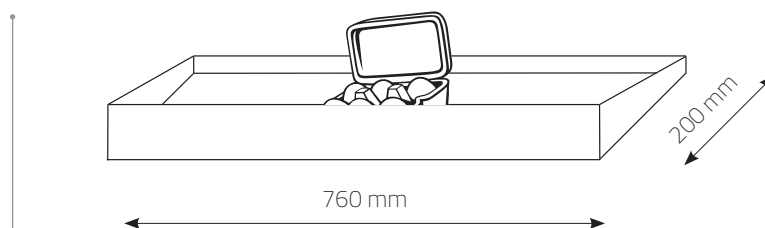

### MAGEX LOADING SYSTEM

It has maximum adaptability to distribute all types of products, with this unique system can be paired more than one lane that will automatically distribute products of different sizes. The system also has interlocking partitions to separate products that are next to one another. This allow complete control of specific lanes so you may dispense products of different sizes.

It also has a self-diagnosis system that will check the operating status of the lane prior to any disbursement of the product.

### LIFT DELIVERY SYSTEM

Product is delivered in the withdrawal area, which is placed under the window, by a lift that does not manipulate or capsize the items, thus allowing the sale of even very delicate products such as technological objects, food, etc.

The dimensions of the lift allow to dispense rather large and fragile products like eggs cases, for example.

# idea 9L

THE NEW GENERATION VENDING MACHINE  
THAT SHAPES YOUR IDEA!

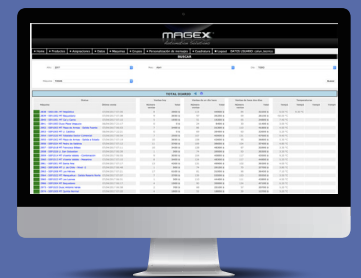

Width	1300 mm
Depth	925 mm
Height	1920 mm
Weight (approx.)	350 Kg
Maximum number of floors	8
Selection on every floor	9
Type of lighting	High luminosity LED (30 W)
Voltage supply	240V/50Hz   110V/60Hz
Internal Temperature	2/18°C
Power consumption (with cooling)	500 W

## REAL TIME DATA SERVICE

Magex provides to all its customers a service for the management of the vending machines updated in real time, connected via web and accessible from laptops, mobile phones etc.

This allows you to view real-time data of each sale, the stock status, the coins/banknotes inserted or returned, automatic reboots and other functions. It also monitors the temperature inside the machine with graphics.

## TECHNICAL SPECIFICATIONS

- Insulation for refrigeration
- Internal cooling unit
- Reinforced retrieval area
- Shatter proof resistant glass
- Console with independent opening
- Touch screen monitor with Android system
- Industrial computer with quad core
- Operating system installed with a SSD 32Gb disc
- LED lighting
- Modular configuration of shelves in height, depth and number of selections
- Console locks isolated
- Self diagnostic system
- Electronic multi-control
- Data management and statistics system
- Temperature control
